SUMMARY

Frontend Developer with 1.5+ years of experience building scalable, high-performance web applications using Angular and React. Contributed to a production ERP platform serving real business clients — resolving 20+ critical bugs, engineering new feature modules that cut development time by ~30%, and optimizing performance through lazy loading and OnPush change detection. Proficient in TypeScript, RxJS, and RESTful API integration, with a track record of writing clean, maintainable code in remote Agile teams. Passionate about crafting seamless user experiences and continuously raising the bar on frontend quality.

TECHNICAL SKILLS

Languages: TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · Sass

Frameworks: Angular (v14+) · React · RxJS · jQuery

UI / Styling: Tailwind CSS · Bootstrap · Angular Material

Tools & Platforms: Git · GitHub · REST APIs · Vercel · Firebase · Node.js · MongoDB

Concepts: Component-Based Architecture · Responsive Design · State Management · ATS-Optimized UI · OOP · Agile/Scrum

EXPERIENCE

Frontend Developer · Digital Universe

Remote · Aug 2024 – Present

- ▶ Maintained and enhanced a production ERP system (live since 2020) spanning inventory, sales, HR, and reporting modules, reducing critical bug backlog by resolving 20+ reported issues.
- ▶ Engineered new Angular feature modules with reusable components and reactive forms, cutting development time for similar features by ~30%.
- ▶ Optimized Angular change detection and lazy loading, improving page load performance across key modules.
- ▶ Integrated 10+ REST API endpoints using RxJS Observables, ensuring consistent error handling and smooth data flow.
- ▶ Collaborated with backend developers in a remote Agile environment, participating in code reviews and sprint planning.

PROJECTS

5dmadev.online — ERP Frontend — Angular · TypeScript · REST APIs · Bootstrap

- ▶ Developed responsive UI modules for inventory, sales, and HR workflows used by real business clients daily.
- ▶ Implemented dynamic data tables with filtering, sorting, and pagination for large datasets.
- ▶ Applied Angular lazy loading and OnPush change detection to improve initial load time.

E-Commerce Platform — Angular · Node.js · MongoDB · Tailwind CSS

- ▶ Built a Jumia-inspired storefront with product catalog, cart, user authentication, and order management.
- ▶ Designed a RESTful Node.js API with MongoDB and connected it to Angular via HTTP services.
- ▶ Achieved fully responsive, mobile-first layout across all breakpoints using Tailwind CSS.

Gaming Hub — Angular · Tailwind CSS · REST API

- ▶ Developed a gaming discovery app fetching data from a public games API with clean card-based UI.
- ▶ Used Angular Router for multi-page navigation and RxJS for reactive data fetching.

Weather App — Angular · OpenWeatherMap API · TypeScript

- ▶ Built a real-time weather app displaying current conditions, temperature, humidity, and 5-day forecast.
- ▶ Implemented Angular HttpClient and services to handle async API calls efficiently.
- ▶ Fully responsive UI with dynamic weather icons based on live data conditions.

EDUCATION

B.Sc. in Computer Science · Delta University — Mansoura

Sep 2019 – Aug 2023

- ▶ Relevant coursework: Data Structures & Algorithms · OOP · Software Engineering · Database Management · Web Development

CERTIFICATION

Frontend Development Professional — Angular & React

Route Academy · Jan 2023

- ▶ Completed an intensive 7-month accredited program covering Angular, React, TypeScript, RxJS, and state management patterns.
- ▶ Built 3+ real-world projects using Angular Material, Tailwind CSS, and Bootstrap — graded on code quality and responsiveness.
- ▶ Delivered a full-stack e-commerce application (Angular + Node.js + MongoDB) as a capstone project, implementing auth, cart, and product management.
